

Series 9062 XT/AT Keyboards

Series 9062 XT/AT Keyboards

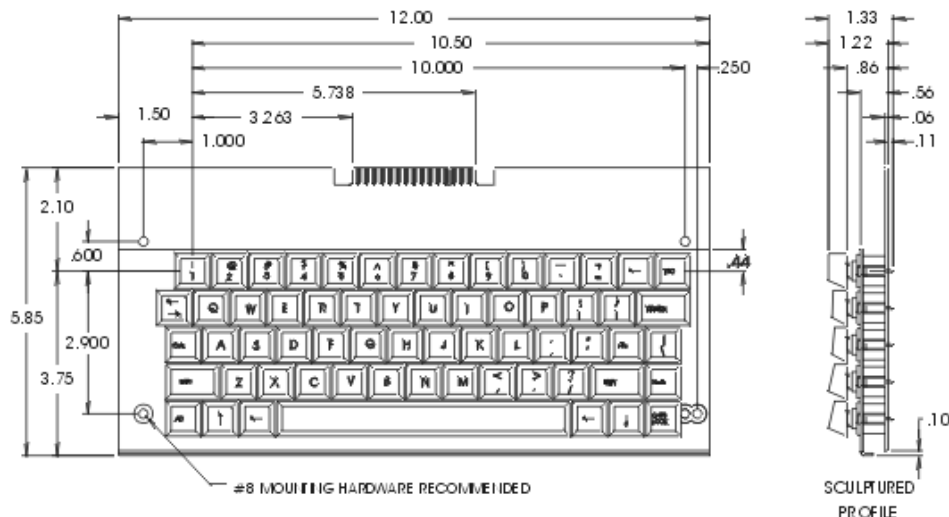

GRI, an industry leader in standard and custom keyboards for over 20 years, presents the IBM* compatible 9062 XT/AT keyboards.

The GRI 9062 XT/AT are the most compact full-size IBM - compatible keyboards available. These expanded typewriter style keyboards function with IBM PC, XT, AT and PS2 systems, and with IBM - compatible computers.

The GRI 9062 XT/AT features overall dimensions of 12" x 5.75" x 1.5" and has 62 white double-shot keys with black engraving. They feature a microprocessor to provide the most requested features in a modern, straight-forward design. Power required is +5 volts.

These rugged keyboards are ideal for applications where space is limited, such as the factory floor, laboratory, etc. They are economically priced and delivery is "off-the-shelf."

Options include enclosures, protocol (XT, AT or enhanced AT) and MIL-SPEC 883B environmental ratings.
