

## Wet Noodle™

### *Magnetic In-Wall Retrieval System*

Accept no inferior knock-offs. Use the ORIGINAL Wet Noodle Retriever System. LSDI developed the ball chain and magnetic retriever concept many years ago to help save installation time. Since its conception, it immediately became a “must have” tool for retrofit installations. Thanks to our customer’s valuable feedback, LSDI has improved upon the Wet Noodle Retrieval System (WNRS) to provide more versatility and functionality. One significant improvement made to the 24” flexible retriever is the addition of a larger more powerful magnet (1/4”) on the end opposite the original 3/16” Neodymium magnet. Rounding out this useful tool system is 10 feet of lightweight ball chain with stop ring and the addition of our 18” telescoping pocked retriever (LBS).

#### *How to use the Wet Noodle*

Create a small hole for an entry point up on the wall (the Wet Noodle works best in uninsulated walls) and drill a small hole at the bottom directly below (1/4”) hole for the small magnet end or 3/8” for the bigger end). Drop the Wet Noodle ball chain down giving it a slight jiggle to make sure it finds the bottom plate. In most cases you will “catch” the ball chain by just putting the magnet end(s) into the bottom hole. If necessary, bend the flexible retriever

into an “S” shape to get into the wall for more difficult retrievals. Slowly pull the ball chain to just inside the bottom hole. Using the pocket retriever, hook the ball chain and bring it out the bottom hole.

The tool kit provides a quick and easy solution for in-wall blind wire pulling making it truly indispensable.

DESCRIPTION	PART NO.	MODEL
Wet Noodle and Retrieval System	LS-85-124	WNRS
10 ft. Ball Chain with Stop Ring and Connectors	LS-85-024	WN10
1,000 ft. Roll Ball Chain	LS-85-025	WN
24” Flexible Noodle Retriever	LS-85-120	R24
18” Extendable Pocket Retriever (See page 97)	LS-53-310	LBS

### *The Auto Noodle with Retrieval Loop*

This time saving and frustration-free tool set is a must-have for new, repair or modifying existing projects such as automotive, RV's, boats, trailers, etc. Our 24" pliable coated noodle has a super strong 1/4" neodymium magnet on one end and is threaded (8/32) on the other. Included in the set is a 1"x 2" flexible wire loop, perfect for attaching, guiding and pulling wires through tight and hard to access areas. A

*Perfect for coach builders, all types of recreational vehicles, trailers, manufacturing, do it yourself projects, auto body, auto repair, motorcycles, all terrain vehicles, boats, agricultural equipment, airplanes and more!*

#### *Possible uses for the Auto Noodle*

Tying wire to the flexible wire loop allows you to guide or pull the wire through tight and difficult paths, such as dashboards, framing, under seats, trunk spaces for stereo installation, trailer hookups and more.

The Auto Noodle can be molded to stand on it's own or wrapped around anything. Especially handy with the Lighted Bullnose Tip, giving you a directed light right where you are working.

Included in the set is the 18" telescoping pocket retriever. The hook is able to reach into places your hands cannot. The Auto Noodle is shown in background with the
