

Drywall Saw

Professionally developed for your needs!

You can count on this tool to deliver superior and long lasting performance thanks to the blade's 8 TPI high carbon steel construction. This is then induction hardened for even longer durability. Even the blade is thicker than typical drywall saws. The tri-beveled teeth were designed straight for cutting in both push and pull strokes that create clean and efficient cuts. Those three cutting surfaces will make your job 50% faster than traditional hand saws. Designed for both straight and curved cutting jobs.

Perfect for cutting drywall, wallboard, plywood, cement board, thin paneling, PVC as well as a perfect addition to your garden shed for sawing small tree limbs, trimming and pruning.

DESCRIPTION	PART NO.	MODEL
Drywall Saw	LS-53-135	DS-6
