

Wire Running “As Easy As That” DVD

Whether a novice or an experienced installer specializing in security, sound, telephone or home automation, this training series will pay for itself by saving you time and enhancing your profits.

Section 1: Unique Bits and Baseboards (18 min.)
How to remove baseboard molding, run wire between tack strip and wall; drill a hole in base molding without removing baseboard; enlarge a hole size with the wire already present without damaging the wire.

Section 2: Drill Bits and Fire Blocks (17 min.) Fire blocks will seem non-existent; see what takes place in the wall when drilling through top and bottom plates. Always find the hole you drilled.

Section 3: Finishing Between Floors (16 min.) Effectively fish wires in multi-story residences. Whether you are mounting devices on a first floor or a basement ceiling learn how to hide wires between floors.

Section 4: Finished Basement and Crawl Spaces (19 min.) The shortest, quickest way to run wire from the basement to first floor. Eliminate having to maneuver in dreaded crawl spaces.

Section 5: Attic Fishing (18 min.) Three professional methods are shown in this section. No matter whether there is just a little, or a great amount of insulation, these methods will cut your time and frustration in half.

Section 6: Insulated Walls (30 min.) Learn how to fish wires in empty walls. How to make insulation work for you, be it stapled bat insulation, moisture barrier stapled over bat insulation, blow-in cellulose or even Styrofoam. Fish from attic down to crawl space; learn the easy way to fin an insulated wall when there is a slab floor.
